Wall Street PRAYS You Never, Ever Find Out…

How to Potentially Turn Just $600 Per Trade Into an Easy, $75,000-100,000+ Annual Retirement Income

(but this Elite Female Trader is teaching regular folks how with a 94% satisfaction rate, and she wants to teach you.)

What if – with just $600 per trade – you could begin collecting monthly Income checks of...

Or more!?

Or, if you prefer to be more aggressive, potentially turn a small, $10,000 portfolio into $1.2 MILLION in just 4 short years?

This report will show you the simple tactics she applies. Shockingly, the proprietary system revealed inside was discovered by one of the world’s most elite (and overlooked!) female traders… a woman you’ll NEVER see or hear about on Wall Street.

Yet using her unique, step-by-step “MERIT” system with its 94% satisfaction rate… you too can imaginably accelerate your path toward early retirement with the opportunity for a nearly six-figure income most Americans would kill for!
Auto-trading, or any broker or Adviser-directed type of trading, is not supported or endorsed by Universal Financial Independence, Inc. (UFI). UFI does not recommend or refer subscribers to broker-dealers. You should perform your own due diligence with respect to satisfactory broker-dealers and whether to open a brokerage account. You should always consult with your own professional advisers regarding equities and options on equities trading. The information provided by the newsletters, trading, training and educational products related to various markets (collectively referred to as the “Services”) is not customized or personalized to any particular risk profile or tolerance. Nor is the information published by Universal Financial Independence, Inc. (UFI) a customized or personalized recommendation to buy, sell, hold, or invest in particular financial products. The Services are intended to supplement your own research and analysis. UFI’s Services are not a solicitation or offer to buy or sell any financial products, and the Services are not intended to provide money management advice or services. Past performance is not necessarily indicative of future results. Trading and investing involve substantial risk. Trading on margin carries a high level of risk, and may not be suitable for all investors. Other than the refund policy detailed elsewhere, UFI does not make any guarantee or other promise as to any results that may be obtained from using the Services. No person subscribing to the Services (“Subscriber”) should make any investment decision without first consulting his or her own personal financial adviser, broker or consultant. UFI disclaims any and all liability in the event anything contained in the Services proves to be inaccurate, incomplete or unreliable, or results in any investment or other loss by a Subscriber. You should trade or invest only “risk capital” — money you can afford to lose. Trading stocks and stock options involves high risk and you can lose the entire principal amount invested or more. All investments carry risk and all trading decisions made by a person remain the responsibility of that person. There is no guarantee that systems, indicators, or trading signals will result in profits or that they will not produce losses. Subscribers should fully understand all risks associated with any kind of trading or investing before engaging in such activities.

Some profit examples are based on hypothetical or simulated trading. This means the trades are not actual trades and instead are hypothetical trades based on real market prices at the time the recommendation is disseminated. No actual money is invested, nor are any trades executed. Hypothetical or simulated performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading. Also, the hypothetical results do not include the costs of subscriptions, commissions, or other fees. Because the trades underlying these examples have not actually been executed, the results may understate or overstate the impact of certain market factors, such as lack of liquidity. Simulated trading services in general are also designed with the benefit of hindsight, which may not be relevant to actual trading. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading.

UFI makes no representations or warranties that any account will or is likely to achieve profits similar to those shown. No representation is being made that you will achieve profits or the same results as any person providing testimonial. No representation is being made that any person providing a testimonial is likely to continue to experience profitable trading after the date on which the testimonial was provided, and in fact the person providing the testimonial may have experienced losses.

Wendy Kirkland’s experiences are not typical. Wendy Kirkland is an experienced investor and your results will vary depending on risk tolerance, amount of risk capital utilized, size of trading position and other factors. Certain Subscribers may modify Wendy Kirkland’s methods, or modify or ignore the rules or risk parameters, and any such actions are taken entirely at the Subscriber’s own election and for the Subscriber’s own risk.

Open trade profit results may have been increased or decreased when trades were closed out. Trading options is not appropriate for everyone. Only risk capital should be used to trade.

In a recent survey of Wendy Kirkland customers, 94% found Wendy Kirkland’s products helpful, and of the subscribers that placed actual trades, half made money.

For typical customer results, please see http://tradewins.com/customer-satisfaction-survey-2018. These survey results are results from prior products and programs offered by Wendy Kirkland. Past performance from these prior programs does not necessarily guarantee positive performance in this product or any product or program in the future. However, subscribers who do not achieve similar returns will gain a financial education through their participation in this program.

There are a number of differences between the programs and trading products from which the survey is comprised. Certain products are free, and others range in price from $7 to $10,000. Certain products require self-study and others provide specific trading suggestions, all of which involve short or long term trading of options on equities. Customer support is available for all products offered.

©Copyright TradeWins Publishing
Hello, my name is Wendy Kirkland—and Wall Street doesn’t want you to know that I exist.

Why? Simple: Because a few years ago, I began using a strategy tied to a little-known trading vehicle—and the trades it spotted are almost too good to be true.

√ Out of 129 total trades, it found 119 that the math shows to be winners. **This system targeted a 92.25% win rate!**

√ Not many systems take an average amount invested per trade of approx. $600 and hand back NEARLY DOUBLE—**$547.58 profit on average—a 95.7% profit per trade!**

√ What would you do if you could begin with a very small account and invest just $600 per trade and potentially finish the **first 12-months with $74,120 in PURE PROFIT?**

√ And that’s just the beginning… the same approach could turn $1,000 per trade into $122,533… $2,000 per trade into $247,066… How close would that put you to your retirement dreams?

√ Best of all, it would have only taken minutes each day—often entering and exiting each lucrative trade in a two day span!

Hard to believe that a 65-year-old lady like me could produce such an effective strategy? That’s what everyone thinks… until they hear my story and see how it fits together.

Because as you’ll see in a moment, I’ve personally used this system to accelerate my own retirement—and in this complimentary report, I’m going to help YOU do the same.

Your Chance to Access This Approach that Could Generate Up to $5000-$10,000 Per Month in Trading Income is RIGHT NOW!
Let’s face it, to have a truly great lifestyle—now or in retirement—you need a six-figure income or close to it. Only then can you travel, shop freely, help others you know—and all the other things you want to do.

By now, I hope you know that traditional strategies—whether it’s your 401k, buy-and-hold investing or anything else—simply won’t get you there.

What I’m about to show you, however, could put you on the fast track to a potential average “side” income of $6,177 each month based on the last 12 months alone. Here is a hypothetical example of how this would have played out:

– In May, I made 10 trade recommendations, 9 of which were winners. And had you received my email alerts, hopped online, and placed those trades…

**You Would Have Had the Opportunity for a NET INCOME of $10,250.52.**

– In June, I had 14 winners out of 15 total recommendations. Had you gotten my alerts, then used a website or broker to place your trade

**Your NET INCOME Could Have Feasibly Been $7,600.**

– And in the most recent April, doing the same thing—you would have won ALL 10 of your closed trades…

**And Your NET INCOME Would Have Potentially Been $8,298.**

See complete QQQ chart with trades/performance on pages 12-14.

In fact, looking at the chart, you will see proof of how it was possible to invest just minutes each week—and yet potentially turn $600 per trade into monthly income of $4,772… $6,730… $7,465… even as much as $10,250—using nothing more than your laptop, tablet or phone.

Keep in mind this is NOT cherry-picking. Out of 129 weekly trades this system locked in on it would have potentially provided 119 winners, with a calculated average profit-per-trade of 95.7%.

**Retiring Early Is All About One Thing: INCOME!**

Look: Only one thing can see your family through this fragile, so-called economic “recovery” in comfort and safety—and that one thing is money.

Only money can pay your mortgage, your monthly bills and help your loved ones through, no matter how long this crisis lasts; no matter how devastating it becomes.

The good news is, the trading vehicle I’m about to reveal can more than double your money when weak stocks plunge. And the great news is that it allows you to profit from almost every major sector, often in the same week.

Using what I’m about to teach you, for example, the more that certain stocks fall, the more money you have the opportunity to make.

That’s why I love using a method during volatile times like these. Of course, losses are always possible with any investment vehicle.
But like mutual funds, this method spreads your risk over a basket of securities. And as with mutual funds, you can trade it in your regular cash brokerage account. You can even put them in your IRA if you wish.

But that’s where the similarities end. Unlike mutual funds...

√ **It costs less to own.** They never nick you for loads or 12-b1 (marketing) fees.

√ **You always know what you own.** You can check online, anytime, 24/7.

√ **This trading instrument is priced continuously through the trading day** — so you always know precisely what your shares are worth ... and you can buy or sell it instantly ... at any time of the day.

√ **Plus, it lets you have a possible profit when a particular index or stock sector goes up or down.** Best of all, you can grab that huge profit potential without buying futures or without selling short, and with ... very little risk.

I’ll give you a hint: **It involves simple, easy-to-trade exchange traded funds** (though what we’re trading and discussing here is a very unique type of ETF few people know about!)

And that means there’s no exotic investments, no margin, no foreign accounts — simply buy or sell this ETF in your regular cash broker account. If you can buy 100 shares of AT&T, you can just as easily buy 100 shares in this special ETF, online or offline.

PLUS, there’s a low cost of entry—making it ideal for investors with as little as $5,000 to invest and also for investors with $100,000 or more ...

And perhaps most comforting of all, you’ll have five layers of protection to shield you from excess risk (more on this a bit later)—meaning the method is designed to help you minimize risk and maximize your returns, boosting your chances to get steadily richer every time certain stocks move up or down.

---

“I can’t tell you how wonderful the system has been for me, all the way around.”

“I’m 72 years old. And I have avoided the stock market my entire life. But now, I have the self-realization that I can do it and that I can do it well.”

“I am just thrilled. I have a whole new life. It’s just awesome. I can’t pull myself away when the stock market is open...I’m addicted to it!” —Jane

Wendy Kirkland’s experiences are not typical. Wendy Kirkland is an experienced investor and your results will vary depending on risk tolerance, amount of risk capital utilized, size of trading position and other factors. Certain Subscribers may modify Wendy Kirkland’s methods, or modify or ignore the rules or risk parameters, and any such actions are taken entirely at the Subscriber’s own election and for the Subscriber’s own risk. Please see hypothetical trade disclaimer on page 2.

No representation is being made that any of the persons who provide testimonials have continued to experience the same level of profitable trading after the date on which the testimonial was provided. In fact, such persons may have experienced losses immediately thereafter or may have experienced losses proceeding the period of time referenced in the testimonial.

There is no guarantee that systems, indicators, or trading signals will result in profits or that they will not produce losses. No representations or warranty is being made that any account will or is likely to achieve profits similar to those shown. Trading stocks and stock options involves high risk and you can lose the entire principal amount invested or more. You should trade or invest only “risk capital” - money you can afford to lose.
The Secret to Multiplying Your Money and Quitting Work Much Sooner!

The secret I’m about to share with you is something my husband Jack calls our “personal ATM machine”—and for good reason…

But before I lay out how it works, let me take a moment to explain how I came to discover this monthly-moneymaker.

I’m sure you’re wondering how someone like me became such a successful trader—I certainly don’t fit any Wall Street stereotypes.

In fact, I live nowhere near Wall Street—my husband and I actually used to operate a gift shop in a quaint little town called Asheville, North Carolina.

Our gift store was successful, and we always envisioned it as our retirement plan… until one day, disaster struck.

A heavy storm hit our area, and our shop was completely flooded—everything lost, and we had no flood insurance. We were in trouble.

So while I began looking for new ways to make money—a friend introduced me to options trading. Somehow, it just made sense to me, and I got really into it.

Actually, more than that…

I Became Obsessed!

I started reading books, watching financial news, taking courses…

Most surprising of all, I got really good. I was beginning to make more money trading than we had ever made in our gift store, so I decided to pursue it full time.

In 2009, I wrote Option Trading in Your Spare Time after successfully trading options for approximately 7 years. I LOVED that my book helped so many people achieve financial independence through trading, just like I had.

In a recent survey of Wendy Kirkland customers, 94% found Wendy Kirkland’s products helpful, and of the subscribers that placed actual trades, half made money.

For typical customer results, please see http://tradewins.com/customer-satisfaction-survey-2018. These survey results are results from prior products and programs offered by Wendy Kirkland. Past performance from these prior programs does not necessarily guarantee positive performance in this product or any product or program in the future. However, subscribers who do not achieve similar returns will gain a financial education through their participation in this program.
“I’ve always enjoyed trading. I wouldn’t do it if it didn’t hold my interest. But I couldn’t make a living of it until I was introduced to Wendy’s system.”

“In January, I read Wendy’s pink book. And right away I switched from trading stocks to trading options. Then, when her System came out I got that.”

“Now, aside from trading, I don’t have to work anymore. Option profits pay my bills and then some. For example, my husband and I just got back from six wonderful weeks in Europe!” — DeeGee, J. Microsoft Instructor

(That system, by the way, allowed us to turn $6,000 per trade into $1.96 million in just 14 months in simulated trading using actual market prices.)

So while I searched for this guaranteed trading pattern, looking through 1000’s of stocks for the newsletter that accompanies the P3, I had one of those “duh!” forehead slapping moments.

Why? Because I couldn’t believe I missed seeing something so obvious—something that was right under my nose since I began trading 7 years ago.

**My Accidental Discovery…**

Let me explain. Back then in my beginning option trading studies, I learned about three trading vehicles. I have taught hundreds of traders about these three instruments to trade:

1) Stocks  
2) Indexes, and...  
3) ETF or Exchange Traded Funds.

Stocks are obvious; Apple Inc. (AAPL), Google, Pfizer and thousands of others fall into this category. This is where I focused most of my attention during those early trading years.

Indexes are usually funds based on something larger. An example would be the S&P 100 Index (OEX) which is based on only 100 of the top S&P stocks or Volatility Index (VIX) which is a summary Index of the S&P 500.

Wendy Kirkland’s experiences are not typical. Wendy Kirkland is an experienced investor and your results will vary depending on risk tolerance, amount of risk capital utilized, size of trading position and other factors. Certain Subscribers may modify Wendy Kirkland’s methods, or modify or ignore the rules or risk parameters, and any such actions are taken entirely at the Subscriber’s own election and for the Subscriber’s own risk. Please see hypothetical trade disclaimer on page 2.

No representation is being made that any of the persons who provide testimonials have continued to experience the same level of profitable trading after the date on which the testimonial was provided. In fact, such persons may have experienced losses immediately thereafter or may have experienced losses proceeding the period of time referenced in the testimonial.

There is no guarantee that systems, indicators, or trading signals will result in profits or that they will not produce losses. No representations or warranty is being made that any account will or is likely to achieve profits similar to those shown. Trading stocks and stock options involves high risk and you can lose the entire principal amount invested or more. You should trade or invest only “risk capital” - money you can afford to lose.
ETFs, on the other hand, are a basket of stocks that often have a theme or connection. A medical ETF might incorporate stocks from cancer research, medical supply and billing, hospitals, nursing and hospice care companies. Other ETFs might be sector or industry related.

The first ETFs I learned about in those early years were the SPY, DIA, and QQQs.

**The QQQs is a type of ETF that is essentially a collection of stocks based on a major index, the NASDAQ.**

Embarrassingly, I’d see the scrawl of the QQQs run across the TV screen as I watched the tickers and think, okay, so the QQQs closed up .06 cents for the day. So what! A volatile stock like Apple offers daily moves up or down that can range anywhere from $1-10... with huge profit potential.

And so for 7 years, I traded options on those stocks almost exclusively. Then one day as I was back-testing the P3 System squeeze pattern on stocks and ETFs in different time frames, I made a huge yet accidental discovery...

Who Wouldn’t Want to Have the Potential to Turn $600 Into $75,000... $100,000... Even More With THE Best Trading Vehicle for Income and Accelerated Retirement!

What I discovered in that moment was that the QQQs have a combination of special elements that make it both lucrative and steadier than most other forms of options trading.

As you’ve already seen from my track record and from further proof I’m about to show you, the steady-yet-explosive profits that are possible with QQQ option trades make it the ultimate early retirement vehicle.

Of all the strategies and systems I have traded, QQQs are the most consistent and reliable. In fact, the first month I officially began trading them, I realized I could potentially make... 223%, 99%, 133%, 158%, 440%, 112%, -47%, 5%, 60% and 280%.

Since I typically found more than 2 trades per week, that is a possible 300% each week

*Does this sound impossible? By the end of this report, and especially after you receive the FREE QuickStart Guide I’m going to send you... you’ll have the powerful tools designed to feasibly generate a monthly paycheck that outperforms any other method you could ever use.*
On a personal level, I’m so excited to be sharing these tools and information—because I’m incredibly passionate about helping others experience the income and security I found after our shop was flooded and ruined.

What Makes Trading QQQs So Lucrative?

The QQQs are sometimes called the Cubes or Qubes.

And the main difference between indexes and an ETF is that with Indexes you don’t actually own the stock. Whereas, the QQQs ETF owns and is comprised of 100 different non-financial companies in the NASDAQ.

The ETF is weighted by market cap. As an example, at the moment, (percentages periodically change) – Apple (AAPL) contributes a certain % to the ETF’s value of 24.4 billion in assets. Other companies like Google (GOOG), Microsoft (MFST), Oracle (ORCL), and Qualcomm (QCOM) add various percentages as do the rest of the 100 companies.

Why does it matter which stocks make up the QQQs?

Since Apple, Inc. (AAPL) adds the largest percentage to the QQQ, often its activity is a leading indicator. That’s just one of many indicators I use to know when the QQQs will move, and by how much.

One thing I especially love about the QQQs is that they are extremely liquid. In other words, both entries and exits are guaranteed because of the number of shares traded. On average, nearly 70 million shares are traded a day.

That also means that, when you trade the QQQs, you have automatic diversification because each share of the QQQs is comprised of the stock of 100 different companies.

Because of the high open interest, high volume and diversification, the QQQs are a lower risk trading vehicle.

Plus, when you look at the QQQs option chain, you will see that the spread between the bid and the ask is often a penny or two. This means the amount the QQQ’s price needs to move before you see a profit is quite small.

“Trades I find are virtually all winners and my potential profits are MASSIVE”

–Nathan V., Software Engineer

Wendy Kirkland’s experiences are not typical. Wendy Kirkland is an experienced investor and your results will vary depending on risk tolerance, amount of risk capital utilized, size of trading position and other factors. Trading stocks and stock options involves high risk and you can lose the entire principal amount invested or more. You should trade or invest only “risk capital” - money you can afford to lose.
More Profitable **AND**
More Secure

In every other respect, the QQQs are and act like every other single equity or security. You don’t need to learn any special chart indicators to interpret the QQQs.

Any stock broker will gladly handle a trade on a QQQs position via the phone or online. Yes, you can easily learn how to place QQQ trades yourself with just a few clicks of your mouse, or some taps on your smart phone or tablet.

Often, it takes just minutes to execute a trade that can nearly double your money... possibly turning $600 into $1,174… $1,000 into $1,957… $2,000 into $3,914… you get the point.

The QQQs can even be traded until 4:15 PM ET, fifteen minutes longer than other equities. That’s very important and creates hidden profit opportunities that I’ll be sending you today in your FREE guide.

On the QQQ’s option chain, you will find strikes at every dollar. You can also trade in penny increments.

**Create a QQQ “Cash Account”**
And Begin
Earning Income This Month!

With QQQ trading, you’ll open a “cash account” rather than a margin account.

From a cash account, you can make as many round-trip trades as you have funds to cover. Remember, funds from today’s position sale will be available tomorrow, the next trading day.

Ideally, you start with around $3,000-$5,000. That means, you could potentially replicate the results you see in this report, while risking only around 10-20% of your account.

---

"The odds are always in your favor... I could make $8,000 in 10 days, and that’s just one example!"

–Carl M., Retired Telephone Lineman

“I love that I have the ability to religiously find trades worth $2,000 to $3,000 a day.”

–Terri F., Accountant

Trading stocks and stock options involves high risk and you can lose the entire principal amount invested or more. You should trade or invest only “risk capital” - money you can afford to lose.
As you get better and your account grows, you could start to increase each trade to $2,000 and begin experiencing some truly amazing returns.

In fact, at last year’s rate of performance—WITH NO COMPOUNDING or REINVESTMENT OF PROFITS—$2,000 per trade could hand you a plausible $988,000 in just 4 years!

How much better would your lifestyle be right now if you were making an extra $250,000 or so? That puts you near the top 1% of all Income earners in the US, while only spending minutes a day checking your account and placing trades...

Before getting into the specific details of opening an online brokerage account (it’s covered in the free guide I’m going to send you today)... I want to show you some of the profit potential from the recent months.

Hyper-Compound Even a Portion of Your Profits, And Your Income Goes Through the Roof!

Let’s look at April as an example of what you could have potentially done with the QQQ’s...

We’ll assume you would have begun with $600 on the first trade – entered and exited on April 2nd – for a 65% return.

That’s $359 in profit – in a single day!

Now, let’s say you rolled your profits, placing $990 on the next trade... which delivered 164% in just three days. Your original $600 has quickly become $2,614.

In that same week, you could have also entered and exited another trade for 66% (leaving you with $4,339)... and another for 352%.

Suddenly, IN JUST ONE WEEK...

Your Original $600 could turn into over $19,610!

And that’s just the first week of the month!
A Year’s Trading with the Quintessential QQQ

The results are based on a starting balance of $15,000, with approximately $600 allocated per trade.

Some profit examples are based on hypothetical or simulated trading. This means the trades are not actual trades and instead are hypothetical trades based on real market prices at the time the recommendation is disseminated. No actual money is invested, nor are any trades executed. Hypothetical or simulated performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading. Also, the hypothetical results do not include the costs of subscriptions, commissions, or other fees. Because the trades underlying these examples have not actually been executed, the results may understate or overstate the impact of certain market factors, such as lack of liquidity. Simulated trading services in general are also designed with the benefit of hindsight, which may not be relevant to actual trading. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading.

## Wendy Kirkland’s Experiences

Wendy Kirkland’s experiences are not typical. Wendy Kirkland is an experienced investor and your results will vary depending on risk tolerance, amount of risk capital utilized, size of trading position and other factors. Certain Subscribers may modify Wendy Kirkland’s methods, or modify or ignore the rules or risk parameters, and any such actions are taken entirely at the Subscriber’s own election and for the Subscriber’s own risk. Please see hypothetical trade disclaimer on page 2.

No representation is being made that any of the persons who provide testimonials have continued to experience the same level of profitable trading after the date on which the testimonial was provided. In fact, such persons may have experienced losses immediately thereafter or may have experienced losses proceeding the period of time referenced in the testimonial.

There is no guarantee that systems, indicators, or trading signals will result in profits or that they will not produce losses. No representations or warranty is being made that any account will or is likely to achieve profits similar to those shown. Trading stocks and stock options involves high risk and you can lose the entire principal amount invested or more. You should trade or invest only “risk capital” - money you can afford to lose.

Total Trades 129

Winning Trades 119 92.25%

Losing Trades 10 7.75%

Total Profit $74,120.52 The average profit per trade is $574.58

Trading Wins $75,147.52 The average profit per winning trade is $630.53

Losing Trades $(1,027.00) The average loss per losing trade is -$102.70

Stock and option trading have large potential rewards, but also large potential risks. You must be aware of the risks and willing to accept them in order to invest in the market. Don’t trade with money you can’t afford to lose. This is neither a solicitation nor an offer to buy/sell any stock.
Of course, I wouldn’t recommend you re-invest your entire $19,610 into the next trade, that would be crazy. But if you rolled just 20% of that sum into the trades for the following week, it would look like this:

- $4,903 becomes $15,247 (211%)
- $3,049 becomes $13,783 (422%)
- $2,756 becomes $5,237 (90%)

Best of all, you’d be reinvesting just a portion of your profits, often referred to as “hyper-compounding”… turning your $600 into over $43,169 in just two weeks!

And we were just getting warmed up…

Rolling another 20% into the next trade—which produces 196%, would now have given you $25,556 and had your overall account up to $57,932…

Do that again on the April 25th trade of 50% (handing you back $17,379)… and again on the April 26th trade of 113% ($27,146)—and before you know it …

You Potentially Generated $78,126 in 30 Days All From Your Small $600 Initial Investment!

Yes, just $600 re-invested and compounded wisely and cautiously had the potential to produce over $78,000.

Now it is not likely that you would have taken every trade, riding the QQQs up and down every day. Not everyone wants to devote that much time to be in front of the computer. (Though, in a moment, I’m going to show you how you can do this much more easily, all in just minutes a day).

And of course, not every month produced such stellar returns. The worst months in the service (January and August) produced only about 25% of the performance. So your original $600 trade compounded may have “only” become $15,000-20,000 with a similar approach.

Still, I think it’s easy to see how trading the QQQs can quickly help you generate a six-figure trading income. How quickly you get there depends on your current account and risk tolerance, but whether you go fast or more patiently, the bottom line is…

You Have the Opportunity to Begin Generating an Early Retirement Income—In Under 10 Minutes

If you look at the previous chart, you’ll see that April was one of the better months but not the best…

Meaning, some months you could have done better, some worse. But overall, there was never a losing month and 92.25% of all trades were winners, with the average trade (including losers) producing 95.7% profit!
Everything That Makes QQQs By Far The Smartest, and Arguably the Most Profitable Way to Trade!

- Extreme Liquidity - Guaranteed entry and exit
- High Daily Volume
- Huge Open Interest
- Automatic Diversification
- Easily Traded With Virtually All Brokers
- Lower Risk Equity
- Small Bid/Ask Spread
- All Option Types available-weeklys, monthlys and LEAPS
- Read QQQs chart like other equity’s chart
- Can short the QQQs
- Same margin requirements as a stock
- No minimum purchase requirements
- Settles in 1 day after closed trade in Cash Account
- Low Volatility (though they help you profit from market volatility)
- Strike at every dollar (sometimes, every .50 cents)
- Trade in penny increments
- Trade day closes 15 minutes later than rest of the market

And even if you choose not to re-invest or compound at all, the simple truth is, in just minutes each day, trading the QQQs could have given you an opportunity to turn $5,000 into as much as $26,491...

Or $10,000 into $52,350 ...

Or $25,000 into a whopping $130,875 ...

IN JUST ONE YEAR.

That means “conservatively”...

Using the MERIT System, You Could Potentially Collect Monthly Checks of $4,772… $6,730… Even $10,250 or Much, Much More

Because of the returns that are possible, and because you need INCOME to accelerate your retirement, I’ve decided to call this system...

MERIT

Which stands for My Early Retirement Income Trading...

And it’s the only trading system focused on the QQQs that hands you performance like this, while speeding you on the path toward luxurious retirement.

It’s designed to help you profit from this current stock market environment whichever way the market turns.

Because only QQQs can make those kinds of potential gains consistently possible—all in a regular cash brokerage account!

Even through the summer—in the months of May, June, and August—when the market is typically flat overall, QQQs could have handed you gains of 102%... 76%... 57%—on a weekly basis.

Thanks to the QQQs, you could have had a chance to bank anywhere from $5,714 to $10,250.

Unfortunately, you can’t go back in time to grab those gains and neither can I.

But it’s crucial to understand two things: First, in each case, your money would only have been at risk for a
brief time. And second, over time, these kinds of short-term gains could have the capability to multiply your money three times… four times… even five times over!

That’s why—starting today—I’m inviting you to test-drive a new service I’m confident can change your life.

Let The MERIT System Help You Potentially Turn $600 Per Trade Into $8,298... $10,250... Even as Much as $78,126 Per Month—Starting Now!

MERIT is my complete, step-by-step system—including my own proprietary trade alerts—for using QQQs to give you the chance to grow your income and give you the lifestyle you deserve, now and in retirement.

If history proves anything, it’s that the ONLY way to build wealth consistently over the long haul is
to avoid excessive risk like the plague. Doing everything I can to limit any losses is the only way to potentially compound your profits over time.

That’s why My Early Retirement Income Trading aims to protect your money and your profits in five crucial ways:

1. **No Margin:** I never, NEVER, recommend using margin accounts or borrowed money. So you’re never exposed to the high risk of shorting or speculating in any leveraged futures.

2. **You’ll Never Have All Your Eggs in One Basket:** Because I use the QQQ exchange traded fund, your investment is always spread out over a basket of stocks.

3. **You’ll Never Get Locked into a Buy-and-Hold Strategy:** My Early Retirement Income Trading is always flexible and nimble — ready to get you into a position or to take your money off the table quickly. We rarely hold a position longer than a week or so. That’s a critical risk-protection feature in today’s volatile market.

4. **I Use Every Possible Tool to Keep You Where The Most Profitable Action Is:** I use every cutting-edge fundamental and technical tool available to enter when potential profits are highest — and to get you to the sidelines when the time is right.

5. **I Designed My Early Retirement Income Trading to Cut Any Losses Short while Letting Your Profits RUN:** Because your money is only exposed for short bursts of time, there’s little risk that you’ll be in a losing investment for more than a few days.

Plus, I Designed My Early Retirement Income Trading (MERIT) To Give You FIVE MORE Huge Advantages ...

I believe the MERIT System is the BEST way you can truly retire early with enough income to do so.

And even beyond the remarkable profit potential it gives you — the very real potential to multiply your money many times over — I’ve designed My Early Retirement Income Trading to give you five more strategic advantages:

1. **You can start with limited capital:** Because the average entry I recommend for the QQQs is as little as $600 per contract, you don’t need to already be rich to go for gains that could make you rich.

   That means it’s ideal for investors with as little as $5,000 to invest and also for investors with $100,000 or more!

2. **There’s nothing to learn:** Just follow the plain-English trading signals 5 to 10 times a month.

3. **No new accounts to open:** You just follow my trading instructions in your regular cash brokerage account!

4. **It couldn’t be any more convenient:** Just check your e-mail each weekday for instructions. When you get a signal, just make the trade.
5. It’s easy to follow: In each trading alert, I tell you what to buy ... when to buy it ... what you should pay ... and I even give you my profit target for each trade.

And I do the same when it’s time to sell. You can execute each trade online or simply by reading the trade instructions to your broker.

Your Complimentary QQQ Quick Start Guide Will Have You Going for Huge Gains in No Time

Your My Early Retirement Income Trading Service comes with my QQQ Quick Start Guide, valued at $297, which tells you virtually everything you’d ever want to know about trading the QQQs profitably ... how to maximize your returns while minimizing your risk, including:

√ 2 factors that significantly stack the odds of success in your favor...

√ The 10 most powerful assessment tools that can help double or triple your potential profits...

√ The single most effective strategy I’ve ever discovered for minimizing losses...

√ How to set up your “cash” brokerage account, and whether to take money out or not once you begin generating profits...

√ The 4 main types of QQQ trades, and when to use each one for maximum ROI...

√ The secret reason why most investors and traders ignore QQQs—and miss out on the best ever trading instrument for high-returns, without excessive risk...

And much, MUCH more.

This guide is everything you need to master QQQ trading—it’s everything I know and do to produce such stunning returns. And I’m sending it to you FREE when you agree try out the My Early Retirement Income Trading (MERIT) service today.

Remember, while the report is extremely valuable—you don’t totally need it to make money.

Because with my trade alerts—where I SEND YOU the exact trades I’ve outlined in this report—you’ll be able to simply place the trade without any learning or experience at all!
Membership is less than ONE-FIFTH of What Others Pay for My Trading Signals — Less Than the Cost of One Cheap Lunch!

You may not know this, but this is the first time I’ve ever offered an alert service focused on trading the QQQs. Still, by comparison, there are option trade coaching programs I’ve offered which sell for $5,000-10,000 per year… and many traders have just paid precisely that much to join us.

But I don’t want you to have to pay that much. The goal here is for you to be able to generate enough income to comfortably retire early—just like I did.

Putting a huge price tag on this trading service and alerts would limit access to those who are already financially secure—which isn’t what I want, and why I don’t even want you to pay half that much.

If you sign up during this special Introductory Period, you’ll save FOUR-FIFTHS of that cost and get all of my My Early Retirement Income Trading signals for just $997 for 6-months. That’s just $5.44 per day; a little more than the cost of a single gallon of gasoline and less than a cheap lunch for one.

Looking to save even more? Great: Sign up for 18 months for just $1,997! That brings your daily cost all the way down to $3.64 per day!

Our “100% Minimum Return” Guarantee Means You’ll At Least Double Your Money… Or You Pay Absolutely Nothing!

Now, despite winning over 90% of all trades I recommended for the year, I can’t guarantee every trade will be a winner. Losses are always possible.

But what I will say is that in all the years I’ve offered recommendations via Trading services—I’ve never failed to make money for myself and clients.

So my guarantee to you is this:

The QQQ trades posted for My Early Retirement Income Trading (MERIT) service MUST generate at least 100% or MORE in pure profits across all trades (including winners and losers)—within 12 full months of your purchase date—or I will refund every penny you paid for the MERIT service.

No questions asked, no fine print. This service must generate that level of performance by the end of the year, or you can request and receive an immediate refund.
The Greatest Profit Potential So Far Is Directly Ahead: Accelerate Your Retirement STARTING NOW!

When you think about it, the decision before you now really is a very simple one ...

You can stay on the sidelines and forfeit the opportunity to grow your wealth for months, even years, and be a prisoner to the market—which, despite its recent growth, could collapse at any time — OR ...

You can thank your lucky stars that we live at a time when we have QQQs that let you have a chance to profit—handsomely—from movements in the market… and that you can join me in USING them to seize the opportunity to multiply your money.

Put simply, you can either choose to sit on the sidelines… or you can choose to use this crisis to grow wealthier—with QQQ trades that could potentially hand you gains of 133%... 201%... up to 440% over and over again—now and well into retirement.

The decision is completely yours to make, of course. But please remember — by joining me in My Early Retirement Income Trading (MERIT) now ...

✓ You get specific buy-sell instructions on QQQs trades tied precisely to the up and down volatility that’s inevitable right now. And no matter what I target, the principle is the same: The more they move, the more money you stand to make.

✓ You get trade alerts focused on the QQQs that are designed to help you profit handsomely when specific stocks rise or fall, according to my proprietary indicators that I teach you more about in your FREE Quickstart Guide…

✓ You get a simpler way to USE market volatility to go for huge gains—even while many other investors all over the world are losing their shirts …

✓ You get trading signals designed to hand you consistent gains that can quickly compound over time; with the opportunity to turn a few thousand dollars into many times that much—creating the income you need to retire much sooner…

✓ You get five ways to cut your risk … to cut any losses short… and to let your profits run …

“This is like having your own personal ATM… This morning I found a trade worth $800 in less than 2 hours!”
—Melvin C., Perris, CA
√ You get My Early Retirement Income Trading Quick Start Guide valued at $297 to get you off to a fast start ...

√ You save up to $8,000 (when compared to my sold-out $10,000 options coaching program) by joining me during this special Introductory Period. That means you get my signals for as little as $3.64 per day—about what most people pay for a single cup of Starbucks coffee ...

And your membership is performance-guaranteed: The service must generate 100% return; base account must double. Otherwise you’re entitled to a full refund, no questions asked.

Get Started Today…
Begin Your Early Retirement Tomorrow

This can be a defining moment in your life… a chance to potentially generate the kind of monthly income you need to have the exact lifestyle you want.

I sincerely hope you’ll decide to join me in My Early Retirement Income Trading (MERIT) right now — before I issue my next flight of recommendations and definitely before you miss the chance to save up to $8,000 on your membership and training.

The toll free number is 888-233-1431—or you can order using the form at the end of this special report.

Be sure to activate your membership now—I can’t wait to help you create the income you need to accelerate your retirement.

I look forward to welcoming you into the program.

Sincerely,

Wendy Kirkland

P.S. Even though the stock market has rebounded, there’s absolutely no way you can trust it to see you safely into retirement and beyond. And forget the government! Social security, pensions, 401k… it’s all under attack.

No, the only true way to retire early with the kind of lifestyle you want is to take control over your income. And that’s exactly what my MERIT System gives you—the chance to turn $600 per trade into a potential six figure income for life.

To get started, just call 1-888-233-1431—or mail in the form on the next page.
The My Early Retirement Income Trading (MERIT) 
New Member Application Form

– As Little As $3.64 Per Day
– MERIT QQQ Quickstart Guide—a $297 Value
– Performance-Guaranteed With 100% Minimum Return On All Recommended Trades
– Membership enrollment could close any time!

YES, Wendy! I love the idea of using your unique system for trading the QQQs to accelerate my retirement by potentially earning up to $8,298... $10,250... even as much as $78,126 in a single month--starting now!

I understand that:

1. My new membership is performance-guaranteed. The service must generate a 100%+ return across all recommended trades, otherwise I’ll get a full refund of every penny I paid and keep the course.

2. The My Early Retirement Income Trading (MERIT) is for my speculative funds only. I understand that while over 92% of all recommended trades were winners, that also means a portion of the trades recommended may not make money, or could even lose money.

3. I understand that you will utilize your unique strategies to cut any losses short, while helping me maximize my winners!
