

## In Just 9mos Live Trading RoboTrader™ Earned 38.6% Trading Apple Stock

We began trading Apple stock with real money in July 2010... just 9 months ago. And, RoboTrader™ has already achieved an amazing 38.6% return.

Mind you, if that rate can be continued it equals an annualized return of 51.33% from trading plain old shares of Apple stock... without the benefit of trading on margin or using clever option strategies to increase leverage.

But, to fully appreciate the power of RoboTrader™, we really should consider a bit more history.

Five years ago... before Steve Jobs announced the iPhone... Apple was selling for \$60 a share.

And, if you'd bought 100 shares of Apple at \$60, you'd now have a profit of \$28,400 ... But, you'd also have ulcers!

Compare Apple's buy-and-hold rollercoaster, and profit of \$28,400, with RoboTrader's steady gain of \$97,900, in hypothetical backtesting.

Striving for smooth growth and more than 3 times the profits, RoboTrader™ took a total of 117 trades: 59 long and 58 short... and recorded a whopping 979% potential return!

And, that's just the beginning... If you'd like to try for returns even higher than 979%. I'll show you how to do that too!

When you say "Yes" to any RoboTrader™ product, you'll receive **"Option Strategies for RoboTrader"** as my free gift to you.

Read all about **"Option Strategies for RoboTrader"** on page 12... And, on page 11, hear how combining RoboTrader™ signals with options gave Marty a 450% profit on a single Apple trade ... Then, pick up the phone, call 888-233-1431, and try RoboTrader™ for yourself... risk free on your subscription price!
